

Furniture information buying guide

In-house 2D and 3D CAD design service

Century has a state-of-the-art on-line planner where customers can design their own office using scaled furniture.

Customers can forward their ideas to any branch or colleagues.

Century can create 2D and 3D CAD rendered drawings to allow you to see how your office will look. We can even add the colours and finishes to the walls and carpets.

These services are free of charge as long as furniture is purchased from us.
